Bulletin #2014-007 23 – May - 2014

Subject:
SFI Specification Changes

Overview:

1. Effective immediately, replace the first paragraph of Article 5.7.A with the following.

   A. No fuel other than that carried in an OE fuel tank, a SFI 28.3 fuel cell bladder, or a FIA FT-3 or higher fuel cell bladder shall be carried in any vehicle.

   Rationale: The new SFI 28.3 specification is comparable to FIA FT-3, so fuel cell bladders compliant with that specification will be permitted.

2. Effective 1/1/2015, replace item 3 under Article 5.1.A with the following.

   3. SFI Spec 31.1/2005 or newer ~~SFI Foundation, Inc.: SFI Foundation, Inc.: SFI Spec 31.1 Rev. A or 31.2 Rev. A~~

   Rationale: These old SFI helmet specifications are comparable to Snell SA2000, which is no longer accepted at Rally America events. This change disallows helmets meeting those old SFI specifications and allows helmets meeting newer SFI helmet specifications.

Questions regarding this bulletin received by Rally America from licensed Drivers and Co-Drivers will be answered in writing.
